LIMITED WARRANTY

Pleated Fly Screens (“PFS”) engineers and produces a high-quality retractable screen system to meet the needs of demanding markets worldwide. Within the limits set forth herein, PFS is proud to warranty products to be free from manufacturing defects.

The following limited lifetime warranty applies to the original purchaser of owner-occupied homes and covers mechanical components excluding screen fabrics or cables. Upon receipt of written notice and proof of purchase, PFS shall have the option to request further information such as photos. PFS shall also have the option to take possession of a defective product or otherwise instruct the buyer. If a warranty claim is approved then PFS will provide replacement components to the buyer, or, at PFS' choosing, return the original sale value to the Buyer. This warranty does not cover shipping, transportation, removal, labour or any other service or cost. Please note that PFS screens are designed to support natural ventilation and protection against airborne insects and other pests. Windy conditions may affect the performance of the screen. Retract the screen in windy circumstances, during inclement weather and when not needed to support immediate ventilation or prolong periods of time when not used.

Except as otherwise specifically set forth herein, PFS makes no representation or warranty, expressed or implied, statutory or otherwise. All implied warranties, including those of merchantability or fitness for use, are hereby disclaimed. In particular, PFS makes no warranty whatsoever that the product will comply with pertinent issued pursuant to any such laws. This warranty supersedes and excludes any other products warranties and may on occasion be modified, changed or replaced without notice. Liability for loss and damages both incidental and consequential, special economic losses or lost profit, or expense or for any failure to perform or delay to perform. In any case, PFS's maximum liability shall not exceed the contract price of the product claimed to be defective.

PFS screens are designed to support fresh natural ventilation and to provide protection against small airborne or crawling insects. Unlike 4-sided fixed framed screens, PFS screens retract in and out of a protective cassette so that you can enjoy an unobstructed view when the screen is not being used. The exposed surface area of the fabric is flexible. This means that during windy conditions or inclement weather, the screen should be retracted so that the fabric is hidden away and completely protected. This screen is not intended to be left open and exposed continually to wind, sun, rain or other harsh conditions. When the screen is not being actively used to protect people or when it is windy then it should be retracted.

Before retracting the screen check to see that:

- The edges of the screen fabric are riding completely inside the guide rails. If necessary then use a soft smooth instrument to push the edges of the fabric inside the guide rails before retracting the screen. Failure to do this may result in wrinkled or torn fabric, a hard-to-operate screen or other damage.
- The fabric is not loose or wrinkled in the opening. Pulling gently on the Pull Bar can help remove slack in the fabric before retracting.

The following are limitations and exclusions from the warranty:

- If usage, adaptation or installation are not in accordance with PFS installation and operating instructions.
- If products are stored improperly, damaged (through no fault of PFS), or modified without PFS's written consent.
- If PFS's written instructions are not properly applied by the buyer or end user.
- If PFS's products have been used to perform functions they were not designed to perform.
- Product failure, shrinkage or color change caused fully or in part by rust, corrosion, abuse or misuse or extreme exposure to sun, heat or wind.
- Certain coastal applications.

The following information is necessary to process any warranty:

- Registration Number
- Proof of Purchase
